

TFU 1743

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

April 19, 2006

In re application of : LAUGLIN, Robert M.
Serial No. : 10/045,229
Filed : November 9, 2001
Entitled : **GAS SAMPLE ANALYSIS
SYSTEM**
Examiner : Ludlow, Jan M.
Art Unit : 1743
Our File No. : 4633.3816

**APPLICANT'S REPLY TO THE EXAMINER'S
RESTRICTION REQUIREMENT**

Mail Stop Non-Fee Amendment
Commissioner for Patents
Alexandria, VA 22313-1450

Dear Sir:

The Examiner has required restriction to one of the following inventions under 35

U.S.C. 121:

- I. Claims 1, 3, 5-6, 8-11, drawn to an apparatus, classified in class 422, subclass 3.
- II. Claims 12, 14, 18-20, drawn to a method, classified in class 436, subclass 181.

The Examiner argues that the inventions are distinct from each other because of the following reasons:

Class 422 is entitled “chemical apparatus and process disinfecting, deodorizing, preserving or sterilizing.” Subclass 3 is described as “process disinfecting, preserving, deodorizing or sterilizing” and includes “a process control in response to analysis.”

Subclass 181 is entitled “Gaseous Sample or with Change of Physical State” and is under subclass 74 which states “Including sample preparation.” The broad class 436 is chemistry, analytical and immunological testing.

Applicant hereby traverses the Examiner’s request for a restriction requirement. It is applicant’s position that the inventions are not distinct and that the process as claimed and the apparatus as claimed clearly reflect one and the same invention. It is difficult to understand how the apparatus claim can be used to practice another material different process. Therefore, it is applicant’s position that the inventions are not independent nor distinct.

In reply to the Examiner’s Restriction Requirement, applicant hereby elects Group II, claims 12, 14, 18-20, drawn to a method, classified in class 436, subclass 181 for prosecution. Applicant’s election is made with traverse.

In re application of: LAUGLIN, Robert M.

Serial No.: 10/045,229
